

June 11<sup>th</sup>, 2018

Margie – Thank you for making the trip from Oklahoma to Washington DC to educate congress members about wireless radiation health effects. You were a real trooper!

Thank you for committing a week of your time to being here and spreading the truth about the serious health effects of wireless radiation exposure which include cancer, neurological disorders, and reproductive damage. You were fighting for the many who could not come to Washington, DC themselves because they could not tolerate the wireless radiation in our nation's capital.

You are what makes America great. Citizens participating and informing our representatives so they can protect our fundamental rights and freedoms! You were able to connect with the representatives personally in a very special way!

Thank you again for your help. You are a wonderful example for others!

Sincerely yours,
